

ABRAHAM LAWAL

OBJECTIVE

Junior Full-Stack Developer with hands-on experience building and deploying full-stack web applications using React, Node.js, Express, and MongoDB. Passionate about building scalable web applications and continuously improving backend and frontend development skills.

EDUCATION

University of the People

2025 to Present; 3.03GPA

Bachelor of Computer Science

PROJECTS

Full-Stack Web Portfolio

A fullstack portfolio i built to test myself

What this project demonstrates

- A polished portfolio with multiple content sections
- A working admin dashboard for artwork and project management
- Protected admin routes with login authentication
- File uploads and media handling via Cloudinary
- Full stack app structure with separate frontend/backend
- Restful Api & GRASP principles

Chat App

A polished full-stack chat application built with React, Vite, Zustand, Express, MongoDB, and Socket.io.

This project demonstrates user authentication, real-time messaging, profile photo uploads, and secure backend APIs for a modern chat experience.

Spotify Clone – Full-Stack Web Application

Built RESTful backend API using Express.js and MongoDB
Implemented user authentication and protected routes
Developed responsive frontend using React
Deployed full application using Render

INTERESTS

- Game developing & design
- 3D Modelling
- Digital Illustration
- Music Producing
- Reading Novels/VNs
